SECTION 1

What is AI literacy for schools?

AI literacy for schools is a structured programme that helps students in Classes 8–12 understand, use, evaluate, and apply AI responsibly. Aligned with CBSE, ICSE, IB, State Boards, NCF 2023, and NEP 2020, it combines student learning, teacher training, assessments, certifications, and implementation support to build future-ready AI skills across the school.

SECTION 2

Why CBSE, ICSE and state-board schools should adopt AI literacy in 2026-27

AI literacy is quickly becoming an essential part of school education in India. Schools that start early can build a structured, responsible approach to AI learning rather than rushing to adapt later.

- **Curriculum Alignment:** NEP 2020, NCF 2023, and CBSE guidelines encourage AI and digital skills in education.
- **Parent Expectations:** More parents want students to learn AI from middle and senior school.
- **College Readiness:** AI projects and skills can strengthen higher education applications and future career opportunities.
- **Teacher Development:** Demand for AI-trained teachers is growing faster than supply.

SECTION 3

The six pillars of the Humain AI Literacy Framework

The Humain AI Literacy Framework helps schools build AI knowledge, skills, ethics, creativity, and critical thinking through six progressive pillars.

- **AI Foundations:** Learn what AI is, how it works, where it is used, and its limitations.
- **Ethics, Safety and Responsibility:** Understand bias, privacy, misinformation, data protection, and responsible AI use.
- **Learning with AI:** Learn how to use AI tools responsibly to support learning, research, and academic success.
- **Creating with AI:** Create images, audio, videos, and projects while developing creativity and originality.
- **Agents and Automation:** Build AI workflows, automations, and practical AI agents for real-world tasks.
- **Human Intelligence in the Age of AI:** Strengthen critical thinking, judgement, communication, and other uniquely human skills.

SECTION 4

Curriculum mapping: CBSE, ICSE, IB, NEP 2020 and NCF 2023

The Humain AI Literacy Framework is designed to align with Indian and international school curricula. It maps to CBSE Artificial Intelligence curriculum requirements (including subject codes 417 and 843), ICSE, IB, NEP 2020, and NCF 2023, helping schools integrate AI literacy into existing learning pathways.

SECTION 5

DPDP Act 2023 compliance: your school's legal position

Indian schools are data fiduciaries under the DPDP Act 2023 when they process children's data. A school AI programme must be compliant by design. This is a summary, not legal advice.

Obligation	How Humain meets it
Verifiable parental consent	Collected through a documented parent-portal flow, not a tick box.
Purpose limitation	Every purpose is named, and data collection is kept to the minimum required.
Data residency and security	All children's data is stored on Indian servers and not transferred abroad.
Access, correct and erase	Handled through the parent portal. Humain operates as data processor under a signed Data Processing Agreement.

SECTION 6

How Humain Works With Your School

Step 1: School Demo

Understand the framework, curriculum alignment, and implementation roadmap.

Step 2: Curriculum Mapping Workshop

Map AI literacy to your school's timetable, subjects, and assessment plans.

Step 3: Teacher Training

Train teachers and coordinators before launching the programme for students.

SECTION 7

Teacher Certification for CBSE and ICSE Schools

Train your teachers to confidently deliver AI literacy across classrooms.

- 4-week certification programme
- Live online training
- Six AI literacy pillars
- Classroom implementation
- Assessment design
- DPDP-compliant practices
- Individual or school cohorts

SECTION 9 (pricing and demo)

Institutional pricing and how to begin

Pricing is tailored to your school's size, curriculum, and implementation requirements.

School size	Indicative annual programme cost
Small school	
Medium school	
Large school	
Multi-campus chain

FAQ

How long does implementation take?

Implementation timelines vary by school and are tailored to specific requirements, goals, and rollout plans following demo discussions.

How does Humain fit with existing curricula?

Humain complements existing CBSE, ICSE, IB, and State Board curricula and can be integrated across subjects.

Is Humain compliant with the DPDP Act 2023?

Yes. Humain follows DPDP-compliant practices and supports responsible handling of student data.

Can we start with a pilot programme?

Yes. Schools can begin with a pilot before deciding on a full-scale implementation.
